CONDITIONS OF BUSINESS SHOW DECIDED GAINS

Stock Exchange Is More Active and Investment Demand Is Better Than on Previous Markets,

By MORNING JOURNAL SPECIAL LEADER WIRE

New York, Dec. 4.—Investment conditions were more promising today. This was demonstrated by the ready sale of the \$12,700,000 worth of Canadian Pacific railway 4½ per cent trust certificates offered by a banking syndicate. There was also a further extension of the inquiry for various short term notes, including New York 6's which retained their recent advantage.

Monetary conditions were again a pronounced factor, the relaxation of rates in thirty- and sixty-day loans being most apparent. There was an even larger supply of call money at 2½ per cent, and most time renewals were reduced to 5 per cent, this figure being scaled on prime collateral.

This phase of the financial situation gave rise to renewed rumors of foreign loans by our bankers as well as the probability of considerable home financing. It was known that a number of domestic corporations were about to enter the market for funds to meet maturing obligations and the approach of the new year was expected to witness many operations of this character.

A few changes, mainly in the direction of improvement, were seen in the lists of stock prices issued by the exchange. People's Gas of Chicago gained 2 points and St. Paul 4, with fractional advances in Pennsylvania and Union Pacific. Trading in bonds was marked by more narrowness and smaller offerings with an irregular mixture of gains and losses, the latter being more pronounced in relatively unknown issues. Gains extended generally from 1 to 4 points. Virginia gold certificates rose 2 points.

Foreign exchange played less than its usual part in the day's business, but drafts on London began in light request. Marks, however, indicate of their recent strength, the advance again being ascribed to German sales of our bonds in this market.

One of the largest railroads placed an order for rails. Other contracts for like materials are said to be pending. Pittsburgh and other steel centers reported an increase of operations and the textile markets also made an improved showing on increased jobbing demand.

Private London cables hinted at a hitch in the proposed reopening of that exchange with a resultant depressing effect on speculative sentiment.

Following are the final prices of stocks as issued by the stock exchange committee today:

BRADSTREET'S REVIEW.

New York, Dec. 4.—Bradstreet's Review will say tomorrow:

Financial recuperation and resumptions make for improved basic conditions for the future, but irregularity still is the distinguishing feature in trade and industry, and a very plainly marked line of divergence is visible between export and purely domestic trade movements. The resumption of bond dealings at New York and in the major parts in the day's business, but drafts on London being in light request. Marks, however, indicate of their recent strength, the advance again being ascribed to German sales of our bonds in this market.
